

**Add** the totals of the multiplications on each pile of blocks together and write the answer on the bear.

e.g.

**Can you solve these word problems?**

Read the problem carefully, underline the key information, write a number sentence and then write the answer.

There are five pencils in a pack. Mrs Jones needs 32 pencils for her class. She says, 'I must buy 8 packs.' Is she right? Explain your answer.

---

---

Will there be any pencils left over? If so, how many?

---

Mo has four bags of marbles with 5 marbles in each. Kyle has 3 bags of marbles with 10 marbles in each. Who has the most marbles?

---

---

Bananas are 10p each. Priya wants to buy seven bananas. She has twelve 5p pieces. Does she have enough money? Explain your answer.

---

---

---

Balloons come in packs of 5 and 10. Sophie has 35 balloons. How many of each pack does she have? Are there other ways to do it?

---

---

Solve these problems using the price list below.

1. Jack buys 4 ice creams, 3 books and 1 football.

Whitney buys 5 footballs, 1 book and 3 ice creams.

a) Who spends the most money? Prove it!

b) What is the difference between the amounts of money they spend?

2. If you spent £50 on the above items, what could you buy? How many different combinations can you find?
