

Pupil Voice - Meeting Notes

Meeting Date: 21st November 2023 **Meeting Time:** 13:30pm

Meeting Agenda: Classrooms & accessing the curriculum

Classrooms

How do you feel we could improve the classroom environment?

We feel that the some of the classrooms can seem a little bland and boring. By adding some of the following things could help improve our learning and engagement.

- Having blinds up at the windows that let a lot of sun light in will help the rooms from getting so hot in the summer. This will also help in the winter when the sun is lower and shines onto the board.
- Better ceiling lights will help the rooms seem brighter.
- Having the classrooms painted in bright but calming colours.

Making changes to our classrooms can make them feel more inviting.

Food technology room

We feel that the food tech room is too small for the number of students required to cook. If we could make the room bigger, we would have more space when preparing food and wouldn't feel like we were working so close to other students. We would like more ovens as we currently only have two and this can sometimes mean that there is not enough space for everyone to cook their food. Adding better ventilation will help circulate the air and will help stop the room from getting so hot.

Curriculum

What subject would you like to see added?

- Drama
- Music
- Business studies

Grades

We know that our grades and targets for the term are in the front of our books/folders. We don't understand the grading but know that we can talk to teachers and find out how we can improve and meet our targets.

Timetable

Having Maths and English everyday one after the other can sometimes be frustrating so would like to have a break in between these lessons. We would like to have more enrichment/personal development in the afternoon as we struggle to keep focused.
