

Pupil Questionnaire results February 2021 on Lockdown learning

It's been tough- there's no doubt, but the children's comments and the results show that online learning overall has been successful. Attendance has been outstanding with online registration daily.

Nothing can replace being in a classroom, but it is lovely to see that the children benefited from the Loom recorded teacher lessons and particularly like that fact that they could see their own teacher.

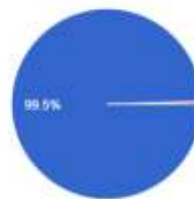

Live intervention responses show that this has made a positive impact for children in seeing their teacher and friends, which has helped them to learn more easily.

I enjoyed it because they say pause on the video when you need to pause.
Sometimes I enjoy them because they are short.

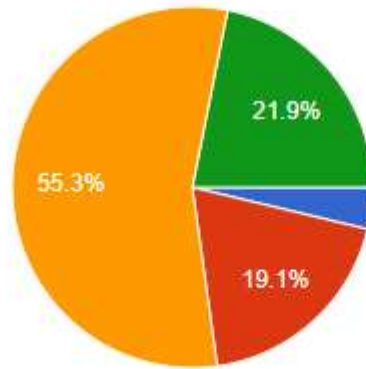

I like maths because before today's lesson I now know how to do division.

It helps me with my learning

how the teacher talks you through the lesson to make sure you understand

I enjoyed the most about these support lessons is that they are very fun.

That I get to meet my friends and teacher and that I get to understand the lesson better

well i absolutly love having google meets and i just like online learning not as much a real life school though

Reading the text

I like being able to have help all the time.

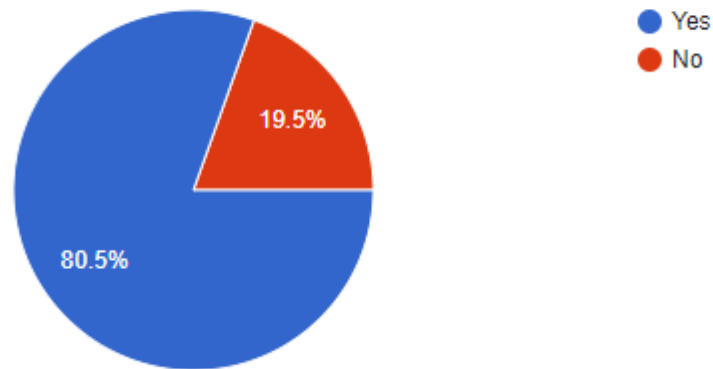

I do not know???

That it's just like in real life where we can see each other and show the work that you have done.

In my writing group I get house points and I also enjoy seeing everyone

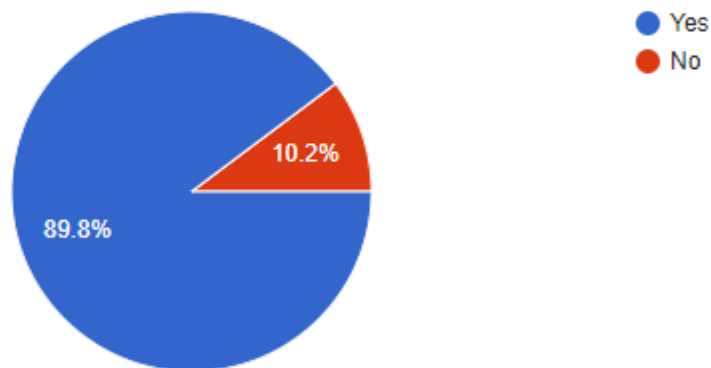

Have you or your parents received a phone call home to see how things are going?

Have the live meets in the mornings with your teachers been useful?

Comments:

because they tell us what is going to happen in the day and we get to see some friends.

They help me catch up with all that is going on and they introduce me to new things.

It's good to have the overview of the week

I can see my classmates every day and my teacher can explain what tasks we have for the day ahead.

You know what is coming in the day and prepared for it.

getting to know the daily timetable and being able to see my freinds (even if it is virtually)

that the teachers tell us exactly what to do so I can focus

When they explain what you have to do in my learning period!

That we can get reminders in case there's a problem.

I like seeing my friends in the Google meets

them breaking down the day to you

The most useful is that we get to see each other.

Just seeing my friends

For the tests (Maths)

To see my class teacher and my friends during lockdown

Do you have any POSTIVE MESSAGES TO STAFF? (Here are just a few.....)

If you could send one positive message to the school/teachers, what would it be?

You are doing amazing!

That they have a very positive attitude at all times and they always answer my private comments when I ask them a question! They also don't panic like I thought they would because obviously whilst marking one week's work they have to plan the next week's work too! Well done to all the teachers in the school! Keep up the good work!
