Who is responsible for Antarctica?

In the news this week

Scientists have found more flowering plants, moss, and algae in Antarctica in the last 10 years than usually grow in 50 years, and the extent of floating sea ice there has hit record lows. Polar explorer and environmentalist, Robert Swan, has been so concerned about the radical changes to Antarctica that he founded the 2041 Foundation, with the aim of ensuring the preservation of Antarctica through the promotion of recycling, renewable energy, and sustainability to combat the effects of climate change. The charity, 2041 School, encourages young people to learn more about the initiative.

Things to talk about at home ...

- Share any prior knowledge you have about Antarctica. Is it a place you would like to visit? Why?
- Do you believe individuals have a part to play in protecting places such as Antarctica or should world leaders do more?
