What is it like to live through an uncertain time?

In the news this week

Scientists monitoring a volcano in Iceland have said an eruption could happen. The Fagradalsfjall volcano previously erupted two years ago, in 2021 - the first time in over 800 years. It is now thought that the volcano is the cause of a series of earthquakes, which started this October. An underground river of magma led to the evacuation of 4,000 people from the town of Grindavik and Iceland has declared a state of emergency. People who live there have since been allowed to return just to collect belongings, with the likelihood of eruptions remaining high.

Things to talk about at home ...

- > Share any prior knowledge you have about volcanoes.
- > How do you imagine the people of Grindavik feel about having to leave their homes, not knowing when they will be able to go back?
