

### Factor pairs

A factor is a number that divides into another number exactly, without leaving a remainder.

28 has 3 factor pairs.

28 has 6 factors altogether.

### Multiplying by 10 and 100

## Year 4 Multiplication and Division B

Th	H	T	O
		7	8

Th	H	T	O
	7	8	0

$78 \times 10 = 780$

Th	H	T	O
7	8	0	0

$78 \times 100 = 7,800$

### Related facts

$3 \times 5 \text{ ones} = 15 \text{ ones} = 15$

$3 \times 5 \text{ tens} = 15 \text{ tens} = 150$

$3 \times 5 \text{ hundreds} = 15 \text{ hundreds} = 1,500$

### Vocabulary

Factors factor pair multiply product lots of divide dividing share equally remainder array systematically 10 times the size of place value chart base 10 tenth hundredth partition short multiplication column represent exchange possibilities combination efficient

- To multiply a number by 10 each digit moves 1 to the left on a place value grid.
- To multiply a number by 100 each digit moves 2 to the left on a place value grid.

- To divide a number by 10 each digit moves 1 to the right on a place value grid.
- To divide a number by 100 each digit moves 2 to the right on a place value grid.

### Multiplication and division

$251 \times 3 = 753$

H	T	O
100 100	10 10 10 10 10	1
100 100	10 10 10 10 10	1
100 100	10 10 10 10 10	1

Measure in  
Kilometres and  
metres

# Year 4 Length and Perimeter

**Vocabulary**  
Kilometres km  
metres m  
partition measure  
greater less length  
equivalent half  
converting perimeter  
side width length  
rectangle rectilinear  
regular polygon equal  
equivalent triangle  
irregular

kilometres (km)

metres (m)

centimetres (cm)

millimetres (mm)

Perimeter is the length around a closed 2-D shape.

Perimeter

Work out the perimeter of the rectangle.

$$5 \text{ cm} + 4 \text{ cm} + 5 \text{ cm} + 4 \text{ cm} = 18 \text{ cm}$$

Work out the perimeter of the **rectilinear shape**.

A rectilinear shape has straight sides that meet at right angles.

$$2 \text{ cm} + 3 \text{ cm} + 3 \text{ cm} + 2 \text{ cm} + 5 \text{ cm} + 5 \text{ cm} = 20 \text{ cm}$$

Which unit would you use to measure each item?

Kilometres	Metres	Centimetres
Distance between two cities	Height of a house	Length of a pencil case

What is the perimeter of the shape?

Perimeter of regular polygons

Each side is 8 cm.  
There are 4 sides, so the perimeter of the polygon is 4 × 8 cm = 32 cm

Which method do you prefer?

$$8 \text{ cm} + 4 \text{ cm} = 12 \text{ cm}$$

$$12 \text{ cm} \times 2 = 24 \text{ cm}$$

$$8 \text{ cm} + 8 \text{ cm} = 16 \text{ cm}$$

$$4 \text{ cm} + 4 \text{ cm} = 8 \text{ cm}$$

$$16 \text{ cm} + 8 \text{ cm} = 24 \text{ cm}$$

A polygon is a **closed shape** made of **straight lines**

What is the perimeter of the regular polygon?

$$7 \times 5 \text{ cm} = 35 \text{ cm}$$

Regular polygons

- All sides are equal in length.
- All angles are equal in size.

kilometres

$$1 \text{ km} = 1,000 \text{ m}$$

$$10 \text{ km} = 10,000 \text{ m}$$

metres

There are 1,000 metres in 1 kilometre.

# Understanding the whole

The whole has been divided into 8 equal parts.

Each part is worth  $\frac{1}{8}$

# Year 4 Fractions (page 1)

What fraction of the shape is shaded?  $\frac{10}{10}$

The **whole** of the shape is shaded.

If the **numerator and denominator are equal**, it is equal to a **whole**. E.g.  $\frac{3}{3} = 1$  or  $\frac{7}{7} = 1$

# Mixed Numbers

A **mixed number** is a **whole number** and a **proper fraction**.

There are 2 wholes.

There are  $\frac{3}{5}$

The mixed number is  $2\frac{3}{5}$

# Comparing Fractions and Mixed Numbers

$$\frac{3}{10} < \frac{7}{10}$$

$\frac{3}{10}$  is smaller than  $\frac{7}{10}$

When the denominators are the same, the smaller the numerator, the smaller the fraction.

$$\frac{6}{7} > \frac{2}{7}$$

$\frac{6}{7}$  is greater than  $\frac{2}{7}$

When the denominators are the same, the greater the numerator, the greater the fraction.

- ### Vocabulary
- whole
  - divided
  - equal parts
  - denominator
  - numerator
  - unit fractions
  - non-unit fractions
  - mixed numbers
  - partitioning
  - number line
  - interval
  - greater
  - integer
  - improper fraction
  - equivalent
  - add
  - subtract

What fraction of the shape is shaded?  $\frac{3}{5}$

What fraction of the shape is not shaded?  $\frac{2}{5}$

# Counting beyond one

$5\frac{6}{7}$  can be partitioned into 5 wholes and  $\frac{6}{7}$

Which fraction is smaller,  $1\frac{1}{4}$  or  $1\frac{3}{4}$ ?

$$1\frac{1}{4} < 1\frac{3}{4}$$

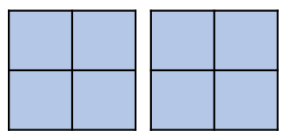

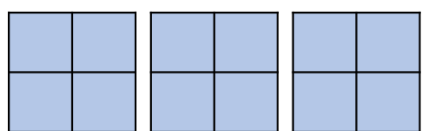

# Year 4 Fractions (page 2)

## Improper fractions

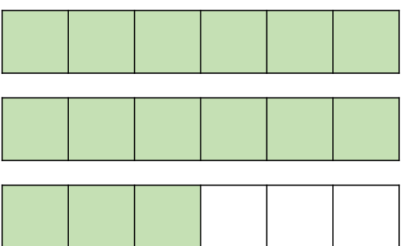

An **improper fraction** is a fraction that has a numerator that is greater than or equal to the denominator.

  $\frac{4}{4} = 1$  whole

  $\frac{8}{4} = 2$  wholes

  $\frac{12}{4} = 3$  wholes

## Convert mixed numbers to improper fractions

The integer in the mixed number is 2  
 This is equivalent to 12 sixths.  
 There are 3 more sixths.  
12 sixths + 3 sixths = 15 sixths  
 so the improper fraction is  $\frac{15}{6}$

There are 2 groups of 3 thirds.  
There is 1 third remaining.  
As a mixed number, this is  $2\frac{1}{3}$

## Equivalent fractions

equivalent

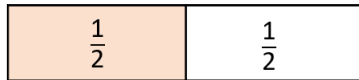

“of equal value, amount or meaning”

 are equivalent to 

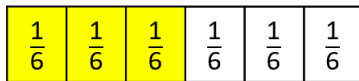

3 + 3 is equivalent to 5 + 1

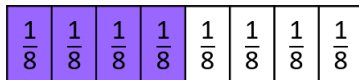

1 cm is equivalent to 10 mm

$\frac{1}{2} = \frac{2}{4} = \frac{3}{6} = \frac{4}{8}$

Adding fractions and mixed numbers

# Year 4 Fractions (page 3)

$\frac{3}{7} + \frac{2}{7} = \frac{5}{7}$

$1\frac{2}{6} + \frac{3}{6} = 1\frac{5}{6}$

When adding or subtracting fractions, the **denominators must be the same.**

Subtracting fractions

$\frac{6}{8} - \frac{4}{8} = \frac{2}{8}$

$\frac{9}{10} - \frac{2}{10} = \frac{7}{10}$

$1\frac{9}{10} - \frac{3}{10} = 1\frac{6}{10}$

Subtract from mixed numbers

$2\frac{4}{7} - 1 = 1\frac{4}{7}$

When I subtract a whole number from a mixed number, the fraction stays the same.

# Fractions and tenths

# Year 4 Decimals A (page 1)

**Vocabulary**  
 Fraction  
 tenth  
 hundredth  
 divided  
 equal part  
 decimal  
 decimal point  
 exchange  
 whole  
 equivalent  
 intervals  
 '10 times the size of'  
 'one-tenth the size of'  
 gattegno chart

What fraction of the flowers are blue?

There are 10 flowers altogether.

3 out of 10 flowers are blue.

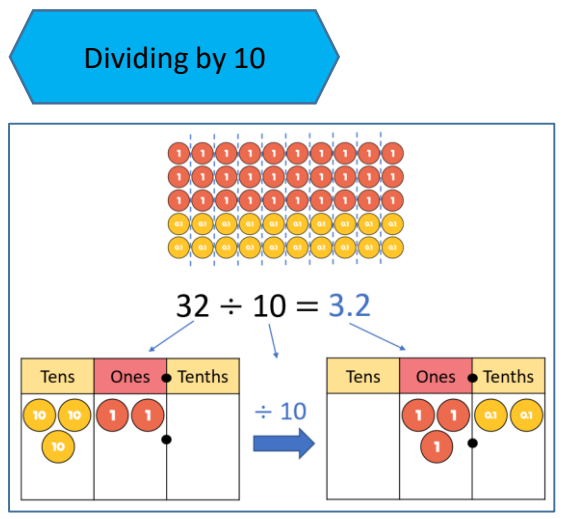

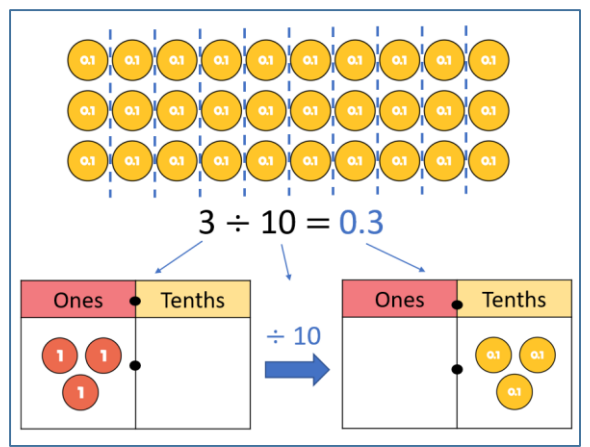

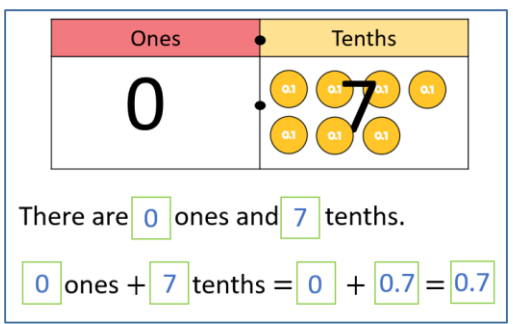

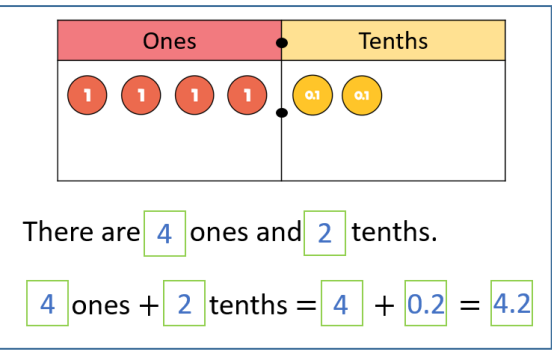

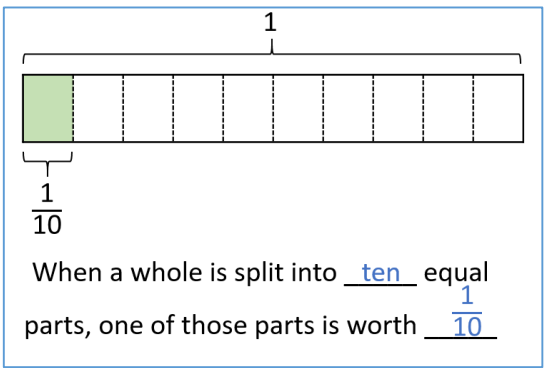

$\frac{3}{10}$  of the flowers are blue.

This is a non-unit fraction.

## Tenths as decimals

$\frac{1}{10}$	$\frac{2}{10}$	$\frac{3}{10}$	$\frac{4}{10}$	$\frac{5}{10}$	$\frac{6}{10}$	$\frac{7}{10}$	$\frac{8}{10}$	$\frac{9}{10}$	$\frac{10}{10}$
0.1	0.2	0.3	0.4	0.5	0.6	0.7	0.8	0.9	1.0

### Hundredths as fractions

There are 100 small squares.

One square is shaded blue.

One out of 100 is shaded blue.

$\frac{1}{100}$  is shaded blue.

## Year 4 Decimals A (page 2)

### Hundredths as decimals

What number is represented in the place value chart?

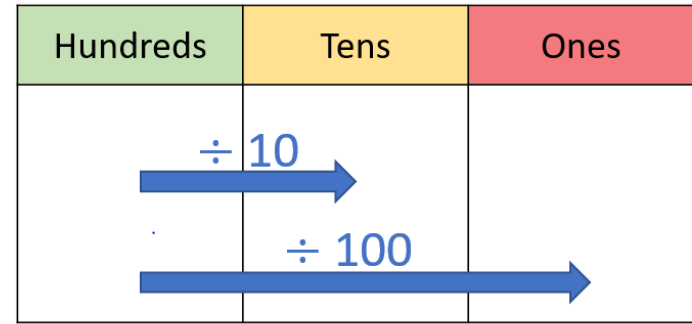

- There are  ones.
- There are  tenths.
- There are  hundredths.
- The number represented is

What number is represented in the place value chart?

- There are  ones.
- There are  tenths.
- There are  hundredths.
- The number represented is

### Dividing by 100

When dividing a number by 100, move all the digits two places to the right .

$3 \div 10 = 0.3$

$3 \div 100 = 0.03$
