

The relationship between 2 and 8 can be described as additive or multiplicative.

Additive

Multiplicative

8 is 6 greater than 2 8 is four times the size of 2
2 is 6 less than 8 2 is a quarter the size of 8

Ratio language

For every 1 circle, there are 2 triangles.

For every 2 bananas, there are 3 apples.

For every 1 football, there are 3 rugby balls.

Year 6 Ratio

Ratio and fractions

What fraction of the bar is shaded? $\frac{2}{5}$

What fraction of the bar not shaded? $\frac{3}{5}$

Write the ratio of shaded to non-shaded parts. **2 : 3**

Write the ratio of non-shaded to shaded parts. **3 : 2**

Scale factors

Shape A has been enlarged by a scale factor of 2 to make Shape B.

Shape B is now two times as big as Shape A.

Vocabulary

multiplicative
proportion

A sequence starts 3, 6,

Explain why the next number could be 9

Explain why the next number could be 12

Ratio represents a multiplicative relationship between a set of values.

For every 4 apples, there are 2 pears.
For every 2 pears, there are 4 apples.

The ratio of footballs to rugby balls: 1:4

The ratio of rugby balls to footballs: 4:1

The ratio of circles to triangles: 2:3

The ratio of triangles to circles: 3:2

The ratio of apples to bananas: 1:2

The ratio of bananas to oranges: 2:3

The ratio of apples to bananas to oranges: 1:2:3

The ratio of oranges to bananas to apples: 3:2:1

Ratio symbol

The bar model shows the ratio 1 : 2 : 4

For every 1 blue part, there are 2 yellow parts and 4 green parts.

What fraction of the bar is shaded blue? $\frac{1}{7}$

What fraction of the bar is shaded yellow? $\frac{2}{7}$

What fraction of the bar is shaded green? $\frac{4}{7}$

Here is a triangle.

Enlarge the triangle by a **scale factor** of 4

If a shape has been enlarged by a scale factor of 4, I need to multiply the dimensions by 4

Ratio and proportion problem solving

Ingredients for Fruit Smoothie (serves 10 people)

- 800g of bananas
- 500g of strawberries
- 200g of raspberries
- 700ml of milk
- 300ml of natural yogurt

To use the ingredients for 1 person, you divide all the quantities by 10 ($\div 10$).

To use the ingredients for 5 people, you halve all the quantities ($\div 2$).

To use the ingredients for 20 people, you double all the quantities ($\times 2$).

In a bag of 15 sweets, there is 1 smiley face sweet for every 4 love heart sweets.

Therefore, there will be 3 smiley face sweets and 12 love heart sweets in the bag.

Year 6 Algebra

A function machine is a way of writing rules.

Substitution

= 10 = 5

What would be the totals of these calculations?

+ + = 20

+ + + = 35

A **formula** is a rule or relationship that uses **letters** to represent amounts which can be changed.

Formula

(s) Number of squares	1	2	3	4	80
(c) Number of circles	4	8	12	16	160

$c = 2s$ $c = 2 \times 80$

- Vocabulary**
- algebra
 - function machine
 - inverse
 - input
 - output
 - rule
 - expression
 - represent
 - substitution
 - worth
 - value
 - formula
 - formulae
 - equation
 - solution

Forming expressions

We can represent these **expressions**.

We can write an algebraic **expression** to represent the perimeter of the rectangle.

Substitution

If $m = \frac{1}{4}$ and $n = 0.2$

work out the value of $m + 3n$

$\frac{1}{4} + 3(0.2)$
 $\frac{1}{4} + 0.6$
 $0.25 + 0.6 = 0.85$

A babysitter charges (c) £9 per hour (h) and £3 for travel.

$c = 9h + 3$

Equation

$x + 5 = 11$

x is a specific unknown value

Forming equations

A bar model to represent each **equation**.

Alex and Tommy have the same number of sweets.

Form an equation to represent this.

$2s + 2 = 10$

$2s + 2 = 10$
 $-2 \quad -2$
 $2s = 8$

$2s + 2 = 10$
 $-2 \quad -2$
 $2s = 8$
 $\div 2 \quad \div 2$
 $s = 4$

8		2
s	s	2

$2s + 2 = 10$
 $-2 \quad -2$
 $2s = 8$
 $\div 2 \quad \div 2$
 $s = 4$

Solving equations

Partitioning Numbers

T	O	Tth	Hth	Thth
10, 10	1, 1, 1, 1	0.1, 0.1, 0.1, 0.1	0.01, 0.01	0.001

There are 2 tens, 4 ones, 4 tenths, 3 hundredths and 1 thousandth.
The number is 24.431

Year 6 Decimals

Rounding 4.8 to the nearest integer.

The previous integer is 4
The next integer is 5
4.8 is closer to 5 than 4
4.8 rounded to the nearest integer is 5

100	200	300	400	500	600	700	800	900
10	20	30	40	50	60	70	80	90
1	2	3	4	5	6	7	8	9
0.1	0.2	0.3	0.4	0.5	0.6	0.7	0.8	0.9
0.01	0.02	0.03	0.04	0.05	0.06	0.07	0.08	0.09

Gattegno Chart

The **red** counter is 10 times greater than the **blue** counter.
The **black** counter is 100 times smaller than the **green** counter.

Vocabulary
decimal
decimal places
represent
tenth
hundredth
thousandths
digit
greater / less
10 times the size of
one tenth the size of
integers
value
rounding multiple

Part-whole model.

$$3 + 0.6 + 0.02 + 0.007$$

Add and subtract decimals

$$15.027 + 9.58 = 24.607 \quad 0.468 - 0.28 = 0.188$$

T	O	Tth	Hth	Thth
1	5	0	2	7
+	0	9	5	8
	2	4	6	0
		1		1

O	Tth	Hth	Thth
0	3	1	6
-	0	2	8
	0	1	8

I can exchange 1 tenth for 10 hundredths

Multiplying decimals by integers

$3.21 \times 3 = 9.63$

Ones	tenths	hundredths
3, 3, 3	0.2, 0.2	0.01
3, 3, 3	0.2, 0.2	0.01
3, 3, 3	0.2, 0.2	0.01

Multiplying by 10, 100 and 1000

- To multiply a number by 10 each digit moves 1 to the left on a place value grid.
- To multiply a number by 100 each digit moves 2 to the left on a place value grid.
- To multiply a number by 1,000 each digit moves 3 to the left on a place value grid.

Th	H	T	O
		7	8
	7	8	0
	7	8	0
7	8	0	0

$78 \times 10 = 780$
 $78 \times 100 = 7,800$
 $78 \times 1,000 = 78,000$

Dividing by 10, 100 and 1000

- To divide a number by 10 each digit moves 1 to the right on a place value grid.
- To divide a number by 100 each digit moves 2 to the right on a place value grid.
- To divide a number by 1,000 each digit moves 3 to the right on a place value grid.

TTh	Th	H	T	O
4	7	0	0	0
	4	7	0	0
		4	7	0
			4	7

$47,000 \div 10 = 4,700$
 $47,000 \div 100 = 470$
 $47,000 \div 1,000 = 47$

Year 6

Fractions decimals and percentages

Percentages

Vocabulary
 Equivalent
 fraction
 decimal
 percentage
 convert
 denominator
 numerator
 equal parts
 equal to
 simplified
 greatest amount
 whole

The hundred square is worth 1

The whole has been divided into 100 equal parts.
 Each part is worth 0.01
11 parts out of 100 are shaded. 0.11 $\frac{11}{100}$

Fractions can be expressed as divisions.

$$\frac{1}{6} = 1 \div 6$$

$\frac{1}{5}$	$\frac{7}{9}$	$\frac{112}{137}$
$1 \div 5$	$7 \div 9$	$112 \div 137$

$$\frac{1}{20} = 1 \div 20$$

$$\frac{1}{20} = 0.05$$

Percent means parts **out of 100**
 There are 37 parts out of a hundred shaded.
 This is 37 %

Converting $\frac{2}{5}$ to a decimal.

To find an equivalent fraction, whatever you do to the numerator, do to the denominator.

$$\frac{2}{5} = \frac{40}{100} = 0.40 = 0.4$$

Fractions, decimals and percentages

	= 1	= 1	= 100%
	= 1/2	= 0.5	= 50%
	= 1/3	= 0.33	= 33.3%
	= 1/4	= 0.25	= 25%
	= 1/5	= 0.2	= 20%
	= 1/8	= 0.125	= 12.5%
	= 1/10	= 0.1	= 10%
	= 1/100	= 0.01	= 1%

Find a percentage of an amount

120

10% of 120 = 12
 $120 \div 10 = 12$

To find 10% of a number, I need to divide by 10

Find four different ways of making 45%

- 45% = 40% + 5%
- 45% = 20% + 20% + 5%
- 45% = 50% - 5%
- 45% = 4 x 10% + 5%

Find 1% of 200

The whole is worth 200

$200 \div 100 = 2$
 1% of 200 = 2

To find 1% of a number, I need to divide by 100

How could we calculate 15% of 80?

$15\% \text{ of } 80 = 8 + 4$
 $15\% \text{ of } 80 = 12$

10% 5%

Perimeter
of
rectangles

Area of
rectangles

Year 6

Area and Perimeter and Volume

Find the perimeter and area of this rectangle.

The formula to find the perimeter of a rectangle is: $2l + 2w$
 $2 \times 7 + 2 \times 5 = 24 \text{ cm}$

The formula to find the area of a rectangle is: $l \times w$
 $7 \times 5 = 35 \text{ cm}^2$

Area of
parallelograms

Area of a parallelogram = **Base** \times **Perpendicular height**
 $20 \text{ cm}^2 = 4 \text{ cm} \times 5 \text{ cm}$

Volume of
cuboids

Volume -
counting
cubes

Vocabulary
area
factor pairs
length width
height
perimeter
side
rectilinear
polygon
regular
irregular
area
compound shape
approximate
estimate

Area of a **rectilinear** shape.

6×4
 24 cm^2

1:

Area of
triangles

3×2
 6 cm^2

3 cm^2

The area of the right-angled triangle is
half the area of the rectangle.

14 cm^2

Area of a triangle = $\frac{\text{Base} \times \text{Perpendicular height}}{2}$

Area of a triangle = $\frac{1}{2} \times \text{Base} \times \text{Perpendicular height}$
 $= \frac{1}{2} \times 4 \times 7$

Volume of a cuboid.

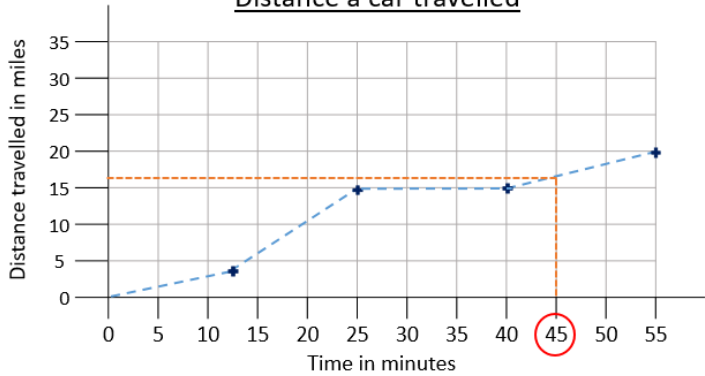

Volume of a cuboid = **Length** \times **Width** \times **Height**
 $= 5 \text{ cm} \times 3 \text{ cm} \times 2 \text{ cm}$
 $= 30 \text{ cm}^3$

Line graphs

Line graphs are used to show changes to a measurement over time.

Data shown in a line graph is continuous. Sets of points are joined together to make the line.

Distance a car travelled

Estimate the distance travelled in 45 minutes. **16 miles**

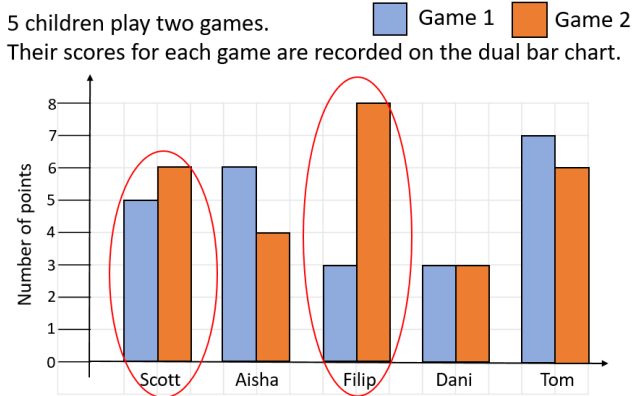

Pie charts represent discrete data.

A circle is divided into segments, where each segment represents a data category. The size of each segment matches its proportion of the total amount.

Year 6 Statistics

Dual bar charts

5 children play two games. Their scores for each game are recorded on the dual bar chart.

How many children got a higher score on their second game?
2 children

Pie charts

Favourite colours

What fraction is red? $\frac{1}{4}$
 What fraction is green? $\frac{1}{4}$
 What fraction is blue? $\frac{2}{4}$ or $\frac{1}{2}$

Two times as many prefer blue compared to red.
Half as many prefer green as they do blue.

Mean average

The mean is the average of a set of data.

Mean = Total ÷ number of items

2 6 1 3 6 6 = 24

24 ÷ 6 = 4

The mean of this set of numbers is 4

Mean = 4

80 children were asked to choose their favourite sport from six options.

Work out the number of children who chose each sport.

20% of 80 = 16 30% of 80 = 24 25% of 80 = 20
 10% of 80 = 8 5% of 80 = 4

Vocabulary

- Line graph
- vertical axis
- horizontal axis
- represent
- interpret
- table
- column
- row
- unit of measure
- timetable
- mean
- pie chart
- dual bar chart

A full turn is equal to 360°

360° represents 100% of the data within a pie chart.
