Today we discussed the weather. Some classrooms are very hot but
most do have fans and some have paddling pools. OUtside there
isn't much shade and Archie suggested having some gazebos for the
summer.
Mary-Jane shared that caretaker Steve said that the toilets in the
Strand are on his list to fix.
We talked about the children in Columbia who survived the plane crash
and 40 days in the jungle. We didn't feel that all children would
know what to do if they got lost. They should find someone
to help them and this might mean breaking the stranger danger
rule.
