

**LO To use column method for subtraction**  
**Mild**

**Steps to success:**

1. Put the largest number on top.
2. Place the digits in the correct place value.
3. Show the subtraction sign
4. **Start in the ones column.** Can you subtract the bottom number from the top?  
Remember, more on the floor, go next door.  
More on top, no need to stop.
5. If there is a bigger number on the bottom, you need to go into the next place value column and borrow 1. Move this into where you need it to subtract.
6. Move onto the tens column. Subtract the top number from the bottom number in the tens column (If you can)
