

## A Maths Story...

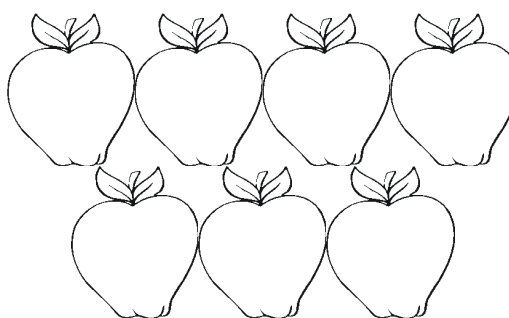

A child picks some apples from a tree.

Then he decides they are not enough and goes to a different tree and picks some more apples.

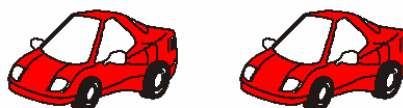

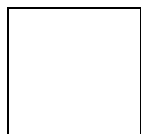

How many apples has he picked altogether? Can you write the calculation you need to do to solve this problem?

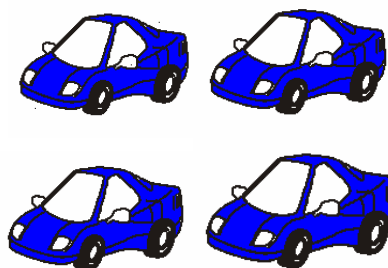

## A Maths Story...

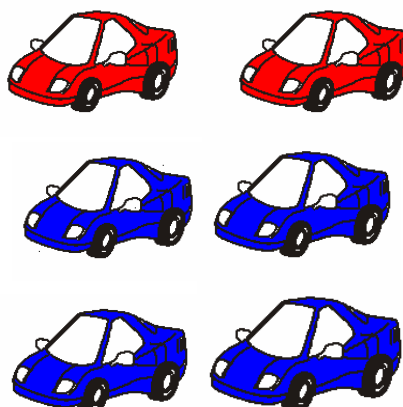

In a car park there are two red cars.

Four blue cars arrive and park there as well.

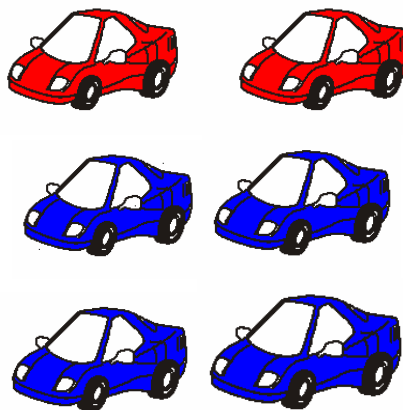

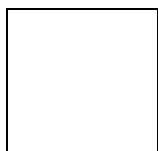

How many cars are parked there now altogether? Can you write the calculation you need to solve this problem?

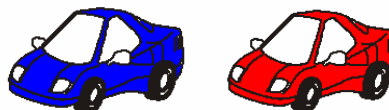

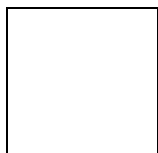

# A Maths Story...

In a car park there are six cars.

Two cars leave.

How many cars are parked there now altogether? Can you write the calculation you need to do to solve this problem?
