LO: To learn about the effects of seismic waves.

What's the difference between an earthquake's magnitude and its intensity?

Explain the difference between p and s waves:

Can you research these three methods of measuring the seismic waves of an earthquake and discuss their pros and cons?

	What is it?	Pros	Cons
The Richter Scale			
The Mercalli Scale			
The Moment Magnitude Scale			

Which method do scientists currently prefer? Why do you think this is?
