

This week, we would like you to write a **non-chronological report** based on the Stone Age.

This will give you an idea of what you should include.

Question!

If 'Chronological' = written in the order in which the events happened

What do you think **NON**-Chronological means?

Answer is on the next page...no peeking before you have an answer!

Non-Chronological =

A report which is not written in order.

Did you get it correct?

The Emperor Penguin

The emperor penguin is the largest of the 17 types of penguins. Penguins are birds but they cannot fly. Instead, their flipper-like wings and webbed feet help them to swim well.

Habitat

Emperor penguins live in the coldest place on Earth: Antarctica. They survive because they have a thick layer of feathers and fat to keep them warm. When it is very cold, they stand together in a huge group called a huddle.

Body

The adult emperor penguin can grow to about 130cm tall. That is about the same as a six year old boy or girl! They look similar to the king penguin but they are much taller.

Did you know...?

- The female lays an egg and passes it to the male. He keeps it warm all winter in his brood pouch.
- Adults can grow up to 130cm.
- They can swim underwater for up to 22 minutes.

What is the report about?

What do you learn about in the report?

What is a bird?

There are about 9,000 different species of birds living on Earth. They all evolved from reptiles millions of years ago. Birds live almost everywhere, from the icy Antarctic to steamy tropical rainforests.

What is the main theme of the report?
What do you learn about?
How is the report presented?
What makes this report interesting and eye catching?

birds have wings not arms

Parakeets belong to the Parrot family.

scaly toes and feet

Bones

Birds have bones that are hollow, like straws. Solid bones would make birds too heavy to fly.

Digestion

Birds cannot chew food as they do not have any teeth. Instead they have a special grinding organ called a gizzard, which is a part of the stomach. Food is crushed as it passes through the gizzard.

birds have a strong horny beak, and no teeth

Wings

Wing shape and size varies hugely between bird species. Birds of prey have wings that are large and strong so they can fly and soar for hours.

Hawks are birds of prey.

Feathers

Feathers are essential for flight, but they also keep birds warm, act as camouflage, and can be used in mating displays. Each bird has several different types of feathers, including down, body, and flight feathers.

down feather

body feather

flight feather

Bird families

The many thousands of bird species are divided into families. The families include birds of prey, songbirds, parrots, waterfowl, and waders.

The plumed whistling-duck is a waterfowl.

The scarlet ibis is a wading bird.

The chaffinch is a songbird.

What is a bird? **TITLE**

There are about 9,000 different species of birds living on Earth. They all evolved from reptiles millions of years ago. Birds live almost everywhere, from the icy Antarctic to steamy tropical rainforests. **OPENING PARAGRAPH**

birds have wings not arms

Parakeets belong to the Parrot family.

scaly toes and feet

Bones **SUB HEADING**

Birds have bones that are hollow, like straws. Solid bones would make birds too heavy to fly.

Digestion **SUB HEADING**

Birds cannot chew food as they do not have any teeth. Instead they have a special grinding organ called a gizzard, which is a part of the stomach. Food is crushed as it passes through the gizzard.

birds have a strong horny beak, and no teeth

Pictures/Diagrams

Wings

Wing shape and size varies hugely between bird species. Birds of prey have wings that are large and strong so they can fly and soar for hours.

Hawks are birds of prey.

Feathers

Feathers are essential for flight, but they also keep birds warm, act as **camouflage**, and can be used in mating displays. Each bird has several different types of feathers, including down, body, and flight feathers.

Pictures/Diagrams

Bird families

The many thousands of bird species are divided into families. The families include birds of prey, songbirds, parrots, waterfowl, and waders.

The chaffinch is a songbird.

The plumed whistling-duck is a waterfowl.

The scarlet ibis is a wading bird.

- If possible, use your line guides to help you with your joined handwriting.

- Write in paragraphs

Draw pictures and label them.

- Use books or websites to find out your facts. There are some links at the end of this PowerPoint.

- Choose an area of the Stone Age that interests you most!

There are some suggestions on the next page.

If you did the Hunter Gatherer task before the holidays, now choose one area of the Stone Age to focus on remembering the **features of a non-chronological report.**

1. Stone Age Animals
2. Stone Age Houses
3. Stone Age Weapons /Tools
4. Stone Age Clothing
5. Stone Age food /cooking

Or a different area of the Stone Age you find interesting!

(Example: for animals, you could choose just one and write about things like their diet, habitat, body or you could write about a number of different animals. The choice is yours!)

Setting Out WAGOLLS

The Courage Bird!

Appearance
The goshawk has a a
dark brown back and
lighter underparts
with dark spots
on its wings. It is
a bird of prey and
is very fast and
agile.

Where it lives
The goshawk lives
in the mountains
and hills. It is
found in the
south of England
and in the north
of Scotland.

Its habits
The goshawk lives
in the mountains
and hills. It is
found in the
south of England
and in the north
of Scotland.

Its food
The goshawk eats
small birds and
insects. It is a
very fast and
agile bird.

Its flight
The goshawk has
a very fast and
agile flight. It is
found in the
south of England
and in the north
of Scotland.

WELCOME TO THE JUNGLE CONGO

What is the Congo?
The Congo is a large
country in Africa.
It is very hot and
has many rivers.
The people live in
villages and
work in the fields.

What are the animals of the Congo?
There are many
animals in the Congo.
There are lions,
elephants, and
giraffes. There are
also many birds and
insects.

What is the climate of the Congo?
The climate in the
Congo is very hot.
It is very humid
and there is a lot
of rain. The people
live in huts made
of mud and
straw.

What is the population of the Congo?
The population of
the Congo is very
large. There are
many people living
in the Congo.

Hola Mexicana!

What is Mexico?
Mexico is a large
country in North
America. It is very
hot and has many
rivers. The people
live in villages and
work in the fields.

What are the animals of Mexico?
There are many
animals in Mexico.
There are lions,
elephants, and
giraffes. There are
also many birds and
insects.

What is the climate of Mexico?
The climate in
Mexico is very hot.
It is very humid
and there is a lot
of rain. The people
live in huts made
of mud and
straw.

What is the population of Mexico?
The population of
Mexico is very
large. There are
many people living
in Mexico.

MISSION IMPOSSIBLE

INTRODUCTION
The mission is to
find the secret code
to the treasure.
The code is hidden
in the jungle.

THE CODE
The code is hidden
in the jungle. It is
a very secret code
and only a few
people know it.

THE TREASURE
The treasure is hidden
in the jungle. It is
a very valuable
treasure and only
a few people know
where it is.

DID YOU KNOW?
The mission is to
find the secret code
to the treasure.
The code is hidden
in the jungle.

Success Criteria

I have included:

- Title
- Subheadings
- Pictures and diagrams
- Paragraphs
- Fact box

I have included:

- Title
- Subheadings
- Pictures and diagrams
- Paragraphs
- Topic Vocabulary
- Question to the reader

Challenge:

Some non-chronological reports include a **glossary**. Can you find out what a glossary is and include one in your own report?

Website Suggestions (you can always use others but make sure you check with an adult first!)
