

### Subtracting by counting back, crossing 10

Use a number track and a counter, or a number line, to jump back or count back to solve these subtraction calculations, crossing over 10.

$16 - 7 = \square$

$18 - 9 = \square$

$13 - 5 = \square$

$15 - 8 = \square$

$17 - 9 = \square$

$14 - 5 = \square$

0	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20
