

Subtraction by partitioning

Use partitioning to work out these calculations:

Example:

$$56 - 23 = ?$$

$$50 - 20 = 30$$

$$6 - 3 = 3$$

$$30 + 3 = 33$$

Use this method to solve these calculations:

1. $65 - 22$

2. $53 - 31$

3. $76 - 11$

4. $64 - 24$

5. $69 - 13$

6. $48 - 25$

7. $99 - 50$

8. $84 - 43$

9. $38 - 25$

10. $126 - 42$
