

What will my child actually be taught about puberty and human reproduction?

Jigsaw's 'Changing Me' unit is taught over a period of 6 weeks, usually in the second half of the summer term. Each year group will be taught appropriate to their age and developmental stage, building on the previous years' learning. Please note: at no point will a child be taught something that is inappropriate; and if a question from a child arises and the teacher feels it would be inappropriate to answer, (for example, because of its mature or explicit nature), the child will be encouraged to ask his/her parents or carers at home. The question will not be answered to the child or class if it is outside the remit of that year group's programme.

The Changing Me Puzzle is all about coping positively with change and includes:

Ages 3-5 Growing up: how we have changed since we were babies.

Ages 5-6 Boys' and girls' bodies; correct names for body parts.

Ages 6-7 Boys' and girls' bodies; body parts and respecting privacy (which parts of the body are private and why this is).

Ages 7-8 How babies grow and how boys' and girls' bodies change as they grow older. Introduction to puberty and menstruation.

Ages 8-9 Internal and external reproductive body parts. Recap about puberty and menstruation. Conception explained in simple terms.

Ages 9-10 Puberty for boys and girls in more detail including the social and emotional aspects of becoming an adolescent. Conception explained in simple biological terms.

Ages 10-11 Puberty for boys and girls revisited. Understanding conception to the birth of a baby. Becoming a teenager.

All lessons are taught using correct terminology, child-friendly language and diagrams.

How can I talk to my child about relationships, puberty and human reproduction?

What children learn at school is only part of the curriculum, and children can continue to learn from you at home. For some parents/carers, it can feel totally natural to discuss relationships, puberty and human reproduction with their child, while for others it can seem uncomfortable. Either way, it is important to remember these key points:

- We all want children to be safe, healthy and happy.
- We need to consider their needs and the world they inhabit.
- We need to normalise talking about relationships, puberty and human reproduction to ensure children feel they can talk to parents/carers about any concerns or worries they may have.
- We may need to challenge our own ways of thinking about how we feel about relationships and sex education.
- We have choices. We can avoid talking about relationships and puberty or we can communicate openly and honestly with children.

Here are some tips for talking to your child:

- Be honest. If you don't know the answer to a question, be honest and say so. Tell your child that you will need to find out and that you will get back to them with more soon.
- Remember that children are curious and want to know and understand. We tend to place our adult perspective on children's questions and comments, when actually a child just wants (and needs) a very simple, age-appropriate, matter-of-fact answer. This answer will not involve an 'adult' understanding of a topic – it needs to be at a child's level, with opportunity given for the child to be able to ask further questions if needed. Give yourself time to respond by asking something like, "What do you think that means?" or "Why do you ask?"
- Keep lines of communication open. Having an open and honest relationship with your child can really help make conversations easier, so make sure that you are always willing to talk when your child needs you; if you can't, explain why and find another time when it is more mutually convenient.
- Use correct terminology. It helps that children aren't confused by hints, euphemisms and innuendo; use correct terminology whenever you can, especially for body parts. This is hugely important for safeguarding too.

- Respond to what children say they need. Bear in mind that children's lives today are very different from even five years ago. Therefore, the education they receive needs to reflect this. Research shows us that children want and need to understand relationships, puberty and human reproduction, and want to be able to talk with parents/carers about this when they have had lessons at school. We may feel that they know too much, when actually ignorance is the enemy of innocence.
- Answer questions and don't be afraid to say, 'I really don't know – let's work it out or look it up together'. Have a phrase for awkward moments, such as, 'That's a good question, and let's talk about it once we get home'.
- Always respond. If you don't, they may think it is wrong to talk to you about relationships, puberty or human reproduction and as a result you may find your child clams up when you want to raise the subject, now or in the future.
- If it all feels too personal, try talking about people in books, films and favourite television programmes.
- Enjoy it. Laugh with each other!
- Work in partnership with the school.
