

A day in the life of a Year 7 at Werneth

My first year at Werneth has been far from normal, and of course overwhelming at times, but every single second I wouldn't have missed for the world.

I had mixed feelings about high school and I was so worried but, trust me, it's very different from what I expected. I only knew a few people when I joined, nonetheless I have made so many amazing new friends!

On the first day you're not alone. You will join a form which you will spend 20 minutes with in the morning. You would have already got to know your form tutor online beforehand.

Werneth may seem huge at first compared to primary school, but now I know it like the back of my hand.

There is a HART space in school that you can visit if you ever need some support or care.

The thing that makes Werneth so special to me is the way they make you feel safe. They let you know you're never alone and always have support for you and everyone else. When we had to return to Lockdown in January, everyone could still learn whether it was online, live lessons, paper packs or help in school, they were there for it all.

We soon got back and returned to normal lessons again. In Technology you get to see and create things out of wood and Food Tech you get to cook and bake. In English you get to write and learn rich, new language. We do French and Maths. Even Drama and Dance. We get to express ourselves, learn, follow scripts, dance and play games. In Science we experiment, we do chemistry and physics. In PE we run laps and play sports such as football or netball, long jump and track. In Art we paint and draw, photograph and create. So many experiences and lessons, so much laughter comes with it all. Every single teacher never fails to make you smile or laugh and there is no way they will ever fail to comfort you at hard times.

You can receive positive points from every teacher and earn badges and rewards to encourage you to do the best you possibly can.

Werneth is an experience you will never forget.

Sofia, Year 7
