

Going back in time... just before the War began,
at Scampston Hall.

Forest School Adventures in the morning!

The children wanted to collect water samples from different parts of the grounds to see if all the water was the same.

We managed to get a couple of samples when on our 'woodland' walk. Luke was great at leading the measuring with a thermometer. The water was less

Using our leaf identification sheets we had a look at all the different types of trees in the grounds. Alice and Isaac found an Oak leaf and tree! We also found Lime, fern and sycamores!

We had lots of fun on our walk, found lots of leaves, bugs, blackberries and some fungus!

We even got ideas for our own bug hotel and what we'd like to do in our outdoor classroom.

Lots of fun, while walking the grounds!

We had lots of fun going through the 'Woodland Trail' in the Scampston grounds. We even found time for a quick class selfie!!
