

you need:

- three 1–6 dice
- pencils

Recognising odd and even for 2 players

First of all

Decide who is Odd and who is Even.
Odd starts.

Odd person, when it's your turn

Roll the dice. Choose two of the numbers and say them out loud.
Add the numbers and say the answer.

If the answer is **odd**, write it in your column.

If it is **even**, do nothing.

Even person, when it's your turn

Roll the dice. Choose two of the numbers and say them out loud. Add the numbers and say the answer.

If the answer is **even**, write it in your column.

If it is **odd**, do nothing.

The rest of the game

Keep taking turns.

The winner is the first person to write ten numbers in their column.
The numbers don't all need to be different.

Odd	Even
7	4
5	2
9	8
7	8
7	10
9	6
	6
	6
	8
	4

Even wins

Now

Swap roles and play again.
Who wins this time?

Odd numbers are black.

Even numbers are grey.

1 2 3 4 5 6
7 8 9 10 11 12

Odd	Even
