

**you need:**

- a bean
- counters

# 20 or more

 for 2 players**Round 1**

Put the bean on any number. That is the total so far.

**When it's your turn**

Move the bean one or two places forward – you choose.

Add the number where the bean lands to the total so far.

If you make the total reach 20 or more, you win a counter.

Now start another round – with a new starting total.

**The end of the game**

When somebody has collected five counters, they win.

**Sample game**

Ayesha and Tam moved the bean from 6 to 7 to 5 to 8. That made 26 – and Tam won a counter.
