

# Horticulture @ WLCHS

## The Aim

- To provide a supported working environment
- To gain skills that will help develop confidence
- To learn about the environment and nature
- To apply knowledge and understanding to learning outside the classroom

## What will I learn?

- Gardening skills & techniques
- Enterprise
- Seasonal gardening
- Planting, growing and maintaining crop
- Environment and community awareness

## How will I learn?

- Classroom based to look at the theory of Horticulture
- Practical sessions to develop knowledge and skills
- Being part of community projects
- Taking part in enterprise projects

## Where will I learn?

- Within a fully supported environment at WLCHS
- Access to a classroom for classroom learning and theory sessions
- Large horticulture site, designed for broadening learning experiences and the application of work skills
- Working in the local community & developing projects

## Impact and Monitoring

- Through completion of units and achievement of assessment criteria
- Attendance, behaviour and well-being

## Outcomes

- Awards through AQA and OCR to show recognition of achievement in the area studied
- Confidence within a working environment and the application of practical knowledge
- A deeper understanding of horticulture and working outside the classroom.
