

Eco Committee Update:

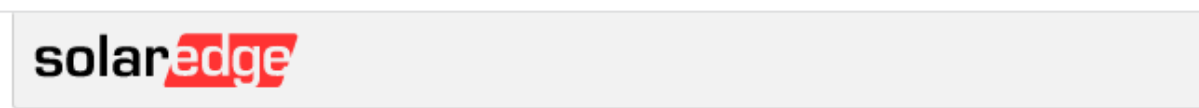

Environmental Benefits ?

 CO2 Emission Saved
4,077.97 kg

 Equivalent Trees Planted
186.67

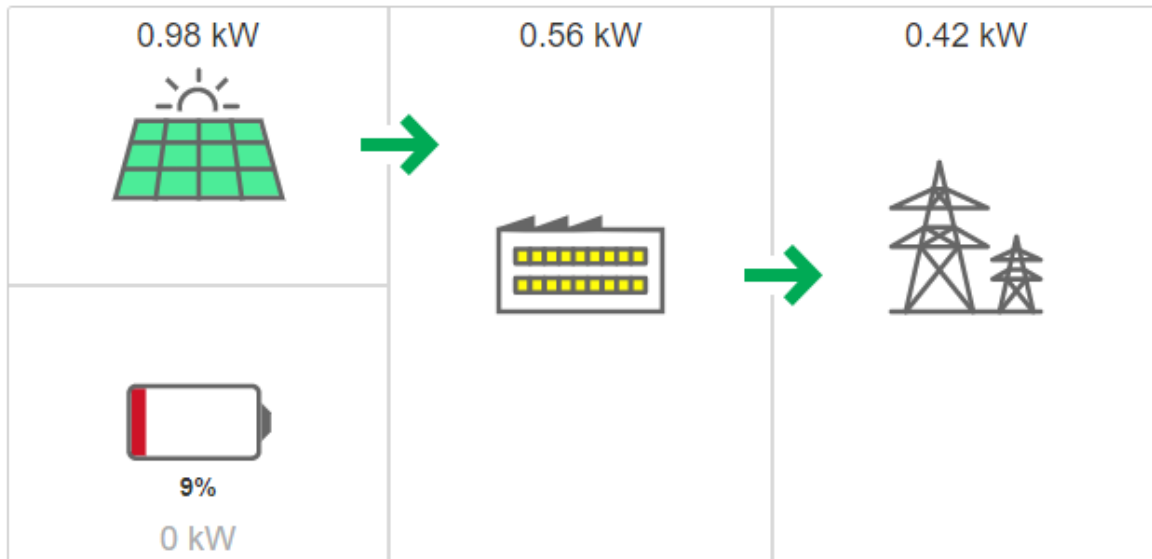

The solar panels have been commissioned and we are already starting to see how this is positively helping the environment. Every week we will put a report into the newsletter to show you how much energy we used, how much energy we made and how much energy we have exported back to the grid. As this is our first report, it shows the totals so far. We expect our energy consumption to increase over the winter and our energy production to decrease, but we are hoping to see overall progress over the whole year.

The Eco-Committee

Dashboard

Energy today 388 Wh	Energy this month 3.32 MWh	Lifetime energy 15.95 MWh
