

# Year 4 Summer 2 Home Learning Projects

<p>Weather Diary Keep a diary of the weather over a week. Record the temperature, high and low; wind, rain.</p>	<p>Weather Folk tales Our ancestors didn't have weather channels or weather apps! They had to rely on signs from nature. Some old folklore predictions are highly accurate, while others are mere superstition. Research some folk sayings about the weather. Present some to our class, explaining what they mean.</p>	<p>DIY Weather Station for Kids Use this webpage link to make and record your daily weather at home, for a week. <a href="https://inventorsof tomorrow.com/2018/01/22/diy-weather-station-for-kids/">https://inventorsof tomorrow.com/2018/01/22/diy-weather-station-for-kids/</a></p> 	<p>Weather forecasters Ask mum or dada to watch the evening news and the weather forecast with you each night. Record what the prediction for London is each day, then compare that to actual weather that day. Is the forecaster mostly correct? What often changes?</p>
<p>Water uses Make a list of all the activities that use water in your house, no matter how big or small. Have you got some ideas on how to use less water for one of those activities?</p>	<p>Changing states of matter Can you create a poster explaining how water turns into a solid or a gas? Remember to label correctly.</p> 	<p>Water Poem Water has so many uses and it is very important resource. Please write a song or a poem to celebrate all that Water gives us to keep us healthy and happy!</p> 	<p>Water cycle Draw a poster explaining the water cycle in your own words. Use your own drawings!</p> 

All Year 3 parents are invited to come to Picasso class on Friday 15<sup>th</sup> July at 245pm, where we will be sharing your projects.
