Adding and Subtracting Fractions

5 Write the answer to these sums as an improper fraction and then as a mixed number.

$$\frac{3}{5} + \frac{4}{5} = \frac{\Box}{\Box} = \Box\frac{\Box}{\Box}$$

$$\frac{5}{8} + \frac{7}{8} = \frac{\Box}{\Box} = \Box\frac{\Box}{\Box}$$

1 mark

6 What is nine fifths plus four fifths?

Write your answer as a mixed number.

$$\Box\frac{\Box}{\Box}$$

1 mark

7 Work out $1\frac{5}{9} - \frac{7}{9}$.

$$\frac{\Box}{\Box}$$

1 mark

8 Fill in the missing numbers.

$$\frac{6}{10} + \frac{\Box}{10} = 1\frac{4}{10} \qquad 1\frac{\Box}{4} - \frac{3}{4} = \frac{2}{4}$$

2 marks
