

Alex calculated $1,432 \times 4$
Here is her answer.

	<u>Th</u>	H	T	O
	1	4	3	2
×				4
	4	16	12	8

$$1,432 \times 4 = 416,128$$

Can you explain what Alex has done wrong?

Can you work out the missing numbers using the clues?

$$\begin{array}{r}
 \square \square \square \square \\
 \times \qquad \qquad \qquad 5 \\
 \hline
 \square \square \square \square \square
 \end{array}$$

- The 4 digits being multiplied by 5 are consecutive numbers.
- The first 2 digits of the product are the same.
- The fourth and fifth digits of the answer add to make the third.
