

"It can't be!" says Hal as he scratches his head,
"I know what that is – it's so round and so red.
It's perfectly clear that this planet is MARS!
I've heard it's the planet that's found next to ours."

"We must find the Sun!" Hal commands with a jump,
"Before we go straight back to Earth with a bump!
This mission is hard – it's a difficult test;
But if I have tried then I've given my best."

Just then, Hal turns back to look at the Earth, and

WHAT DOES HE SEE?

The planet is moving – it's turning around!
It's slowly rotating without any sound!
Hal zooms round to find where his bedroom
has gone
And what does he find? He discovers...

the SUN!
