

Maths/Topic Challenge

Energy Source	%
Gas-fired power stations	40.7
Renewables	28.1
Nuclear plants	22.5
Coal-fired power stations	1.3
Electricity imports	7.4

1. Round each amount to the nearest 10.
2. Label or colour each energy source on your x axis (the bottom).
3. Write the y scale in 5s. You can be even more exact if you want to by not rounding each number or changing your scale.
4. Complete your bar graph. **You can draw on paper or print.**

Challenge

Has the data in this table changed as of 2020? Do we use more renewable energy now? See if you can research this/find it out!
