

Tuesday 12th January

Note Taking

Learning objective:

Today I am learning to take notes

Success Criteria:

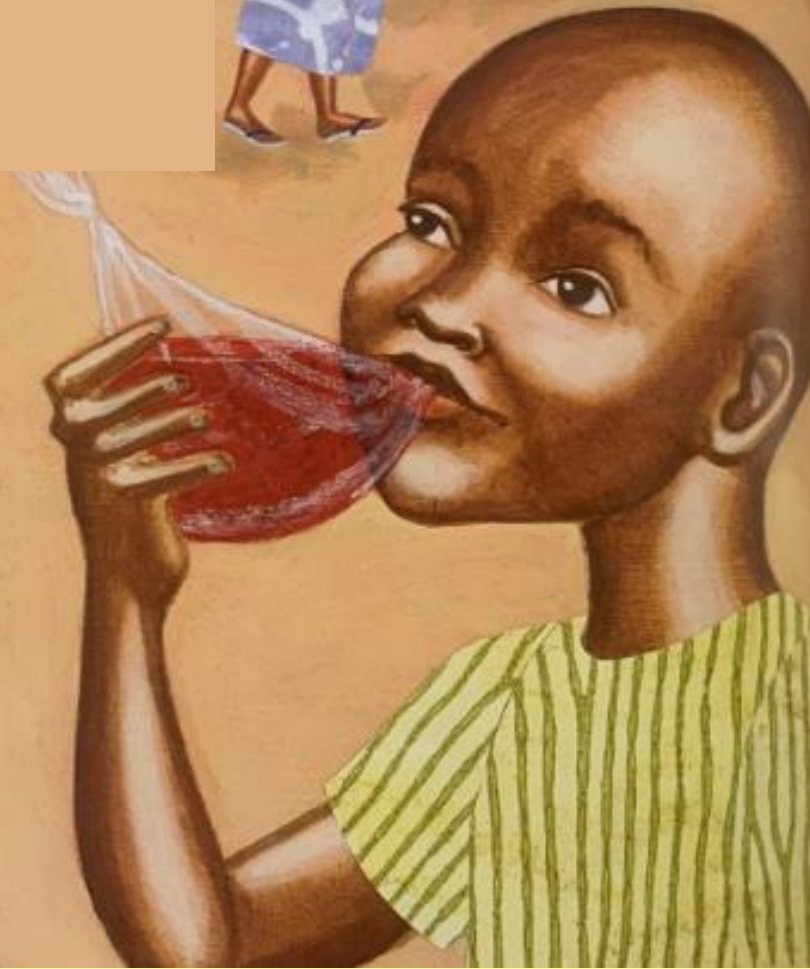

I know I will be successful if -

I can research to find out my own information.

I can neatly set out my findings

I can understand what should be written down and what shouldn't

Day after day, Isatou watches neighbors tote their things in bright blue or black plastic bags. Children slurp water and *wanjo* from tiny holes poked in clear bags. Market trays fill with *minties* wrapped in rainbows of plastic.

What items can be made from plastic?

Write down as many things as you can think of!

Task

*Use the internet to research the properties of plastic and what makes it such a useful material.

Either, neatly bullet point your notes OR neatly create a spider diagram to gather your notes.

Remember our work in school on note taking. You don't need to copy every single word! Just make sure you get the important information.
