

## 15.1.2021 Quick Maths

A

- $25 - 17 =$
- $26 \times 4 =$
- $3\text{mm} + \underline{\hspace{1cm}}\text{mm} = 6\text{cm}$
- Find all factor pairs of 36

6m  
11m  
Area =  

B

- $77539 - 27543 =$
- $1/4$  of  $\underline{\hspace{1cm}} = 13$
- $390 \div 3 =$
- $5 \times 4 \times 8 =$  4m

27m  
Area =  

## Challenge

Always, sometimes or never?

In a box of 48 muffins, there were 18 chocolate, 22 blueberry, 6 lemon and 2 raspberry muffins.

1. If I had 8 boxes, how many of each muffin do I have?
2. How many muffins do I have in total?

## Flashback 4

Year 4 | Week 2 | Day 4

- 1) Find  $16 \times 5$
- 2) What is  $8 \times 5 \times 2$ ?
- 3) 10 lots of 8 is equal to?
- 4) What is 800 subtract 120?

### Column Multiplication Recap

You can multiply numbers together using a number of techniques. One written method that we will focus on is column multiplication. It looks like this...

$$\begin{array}{r} \text{T} \quad \text{O} \\ 1 \quad 2 \\ \times \quad 4 \\ \hline 4 \quad 8 \end{array}$$

### Column Multiplication Recap

The first step is to place your digits in the correct columns.

$$\begin{array}{r} \text{T} \quad \text{O} \\ 1 \quad 2 \\ \times \quad 4 \\ \hline 4 \quad 8 \end{array}$$

Then, like column addition, we begin with the Ones column. We multiply the Ones digits together (in this case,  $2 \times 4$ ), writing the answer in the Ones column inbetween the lines. Next, we multiply the Tens by the Ones ( $1 \times 4$ ), writing the answer in the Tens column.

## Column Multiplication

### Learning Objective:

Today I am learning to

- use a written method of multiplication
- be able to exchange when multiplying numbers together

### Success Criteria

I will be successful if I can

- multiply 3-digit numbers by 1-digit numbers
- exchange numbers confidently
- develop my reasoning skills

### Key Vocabulary

- column
- place value
- multiplication
- product
- multiples
- exchanging
- exchanging

## Column Multiplication - with exchanging

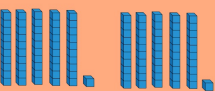

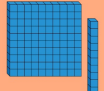

$$\begin{array}{r} \text{T O} \\ 26 \\ \times 3 \\ \hline 78 \\ 1 \end{array}$$

DONT FORGET TO ADD THE EXCHANGED NUMBER!

Sometimes, we have to exchange digits if you are greater than 10. In this calculation, we must exchange 1 TEN for 10 ONES. The 1 that we exchange belongs under two lines, the same as when we exchange digits in column addition and subtraction.

$51 \times 2 =$

Written method

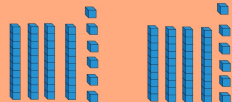

$$\begin{array}{r} 51 \\ \times 2 \\ \hline \end{array}$$

HUNDREDS	TENS	ONES

What do we do with the 10 TENS?

$46 \times 2 =$

Written method

$$\begin{array}{r} 46 \\ \times 2 \\ \hline \end{array}$$

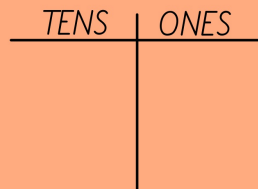

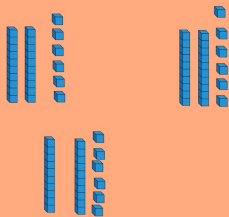

TENS	ONES

$$26 \times 3 =$$

Written method

$$\begin{array}{r} 26 \\ \times 3 \\ \hline \end{array}$$

### Task

You must use column multiplication to solve the following calculations.

#### A

Maths - 'A'  
activity (Q1-Q6)

#### Challenge

Can you have a  
go at the  
challenge? Please  
use column  
multiplication.

#### B

1.  $27 \times 2 =$
2.  $71 \times 2 =$
3.  $18 \times 5 =$
4.  $23 \times 4 =$
5.  $31 \times 6 =$
6.  $34 \times 3 =$
7.  $28 \times 4 =$
8.  $19 \times 5 =$
9.  $37 \times 3 =$
10.  $29 \times 4 =$

#### C

1.  $27 \times 4 =$
2.  $38 \times 6 =$
3.  $41 \times 4 =$
4.  $73 \times 4 =$
5.  $82 \times 3 =$
6.  $26 \times 6 =$
7.  $56 \times 8 =$
8.  $194 \times 8 =$
9.  $278 \times 5 =$
10.  $1047 \times 3 =$
