

Prime number lotto

This game needs at least two players. Each player will need their own lotto card (page 2).

Cut out the number cards below and place them face down in two equal piles. In turn, each player picks two number cards. The two cards are placed together in the order they are picked up to form a number. Each player crosses out the number they have made on their lotto card.

After each player has had 10 turns, the player with the most prime numbers crossed out wins. Prime numbers are shown in blue on the lotto card.

0	1	2	3
4	5	6	7
8	9	0	1
2	3	4	5
6	7	8	9

Each time you cross out a prime number, shout 'prime number!'
