

1 Given that $A + B = C$

Draw an arrow pointing to C

A

2.5

B

22

C

24.5

2 George has a box of counters.

- For every 2 red counters there are 5 blue ones.
- George removes 36 blue counters from the box.
- There are now the same amount of red and blue counters.

How many red counters were in the box at the start? **24 red counters.**

3 Elijah says he divided 32 by a number and got 64

Is this possible?

Yes, he could divide by 0.5
