

B

- 1 Sort the shapes into the Carroll diagram. The shapes aren't drawn to scale, but one box covers 1cm^2 .

	Quadrilateral	Not a quadrilateral
Area $< 14\text{cm}^2$		
Area $> 14\text{cm}^2$		

- 2 Draw another shape that would fit into each box from the diagram above.

- 3 Draw at least three shapes for each of the following areas:

17cm^2

24cm^2

25cm^2

32cm^2

- 4 How many rectangles could you draw for each of the areas given above? (You don't have to draw them, you just need to give their measurements.)
