

Year 5 Spring 1 Homework

For homework, we would like you to become an expert on a planet. You need to choose a planet from the solar system and create a detailed presentation about it. You may present your findings in various ways such as posters, power point, models, leaflet... the choice is yours. We have shared some ideas with you in the class. If you require any resources such as large paper please ask. As this is a large project, you will have a deadline of Friday 31st January. We suggest you plan your time wisely for example:

Week 1 - Research into your planet.

Week 2 - Create a model/ piece of art of your planet.

Week 3 - Use your research to produce your presentation.
