

Creative Curriculum

Our school approach since 2010 has been to teach the foundation subjects in a thematic approach to ensure that a creative and skills based approach to teaching and learning is experienced by all pupils from Year 1 to Year 6. The curriculum map has been devised in line with the National Curriculum (2014) to ensure that children are being taught the necessary knowledge as expected for their age. **Due to changes in the National Curriculum and ofsted's inspection framework our school is currently reviewing and altering its foundation sub curriculum provision.** Coupled with this, the schools' curriculum team have ensured that each "topic" pupils experience not only provides each of them with essential knowledge but also skills relating to specific areas of learning whilst promoting cross curricular links with other subjects. The expectation of the "Creative Curriculum" is to provide our pupils with a wide range of learning experiences that broaden their life experiences and foster enthusiasm for learning.
