

Time period	Amount of funding received	Amount spent	How the money has been spent	Effect on pupils' PE and sport participation and attainment	How we will make sure/have made sure the improvements are sustainable
May 2018 - June 2019	£19,608 + £5247 surplus from 17/18 = £24,855	£4375	<p>The money has been spent on a sports coach from Steps2Sport who supports in PE lessons 1 afternoon a week up until the May half term</p> <p>The coach has primarily supported our teacher's in reception who are new to the year group, in order to improve their subject knowledge and confidence. The CT's teach the lesson with the sports coach supporting the delivery and providing ideas and expertise for future lessons. Both have expressed a greater confidence in their ability and now have a range of ideas to use with our youngest children.</p> <p>We stopped this at May half term due to the decision to change the approach to teaching and further training we have bought into for next year.</p>	<p>Children have increased participation as they want to take part in PE lessons as they are more challenging and suited to their abilities.</p> <p>They also have increased attainment as they make clear progress through the unit.</p>	<p>These improvements will be sustainable as the staff are more confident in the future at planning lessons with clear progression.</p>
			<p>The sports coach has also continued to run after-school clubs. These are paid for in part by the parents and in part by sports premium.</p>	<p>We have already seen a huge increase in participation, with waiting lists for clubs, and anticipate that this will continue.</p>	<p>As this is paid for in part by the parents, this will be sustainable in the future as they are already used to paying.</p>
		£4200+ £525 for coaches to the extra swimming	<p>Central School Sports Partnership. This entitles us to:-</p> <p>Access to Top Up swimming. We can select up to 15 pupils in year 5 or 15 pupils in year 2 who are unable to swim 25m (or require extra support) for a 4 week intensive swimming block over the course of 4 weeks.</p>	<p>15 year 5 children went for these extra sessions and so are now able to swim much more confidently.</p> <p>They still have their NC time in the summer term and so should be able to swim 25m by the end of year 6.</p>	<p>This would not be sustainable without the extra funding.</p>

			<p>Membership to the Youth Sport Trust: This provides us with additional resources and CPD courses, all of which are coordinated through the School Games Organiser (SGO). Courses include Active Literacy and Active Numeracy plus several other relevant courses.</p> <p>Play Leader Programme: Opportunity to send 12 pupils in years 5/6 to train to become play leaders.</p> <p>Year 1, Year 2 and Year 3 Multiskills Festival -This competition enabled us to send all of our pupils in year 1 and 2 over 2 days.</p> <p>Year 4 and 6 Multisports Festival - The children were able to try Archery, Cricket and Athletics</p> <p>12 children have been trained to be skills challenge leaders where they run activities to enable the children to compete against themselves to try and improve their score.</p>	<p>These courses provide training and therefore further expertise to our staff in their delivery of PE.</p> <p>This has had a huge impact on the children who are leaders and their engagement, as well as that of the children they are encouraging to play games at break and lunchtimes.</p> <p>The children loved this competition and it was an opportunity for the year groups who do not usually get the chance to compete. The older children had the chance to try different sports.</p> <p>This has improved the children's confidence in leading activities but also given more opportunities for a larger number of children to be active on the playground to try and achieve the active 30:30 target.</p>	<p>The expertise which the staff have obtained will be sustained and passed on to other staff.</p> <p>Now we have the resources, we could train the children internally if the need arose in order to continue the program.</p> <p>We could potentially organise something like this in our school and invite others to it, but it would not be possible for it to be on such a large scale.</p> <p>As with the playleaders, we now have the skills challenge resources and could do the training internally.</p>
	£1450		<p>Blackwell Adventure - We take Year 5 here for a day so that they are able to experience outdoor activities which is part of the NC requirement. The Sports Premium money means that we are able to subsidise the day and so the</p>	<p>This means that all of the children are given the opportunity to experience outdoor activities which they do not normally have the chance to</p>	<p>As the children contribute to the payment, we could still afford a half day experience if the</p>

		children can pay £12 for an experience which should cost £25.	experience. They can then be inspired to carry these on outside of school now or in the future. It also has massive benefit in drawing out teamwork, confidence and perseverance in the children as they experience new things.	funding was no longer available. It is now ingrained in the school calendar and so the trip would continue.
	£110	Supply cover for PE coordinator to complete Sports Premium spending review.	N/A	N/A
	£2300	DanceBugs After school clubs We paid for a gymnastics club for the whole year and a dance club for the autumn term.	75 children have attended the 3 gymnastics clubs and 20 the dance club. As the dance wasn't as popular, we made	The children pay a subsidised rate and so parents would be used to paying so if the uptake was good enough, we could continue with this but with the parents paying full price.
	£360	A trip to Edgbaston Cricket Ground for all 60 year 5 children to increase their engagement in sport.	This really engaged our youngsters, particularly as our year 5s last year had a massive interest in cricket and it allowed them an experience that otherwise most of them would never have.	This would not be sustainable without the Sports Premium unless we asked parents to pay for the trip.
	£329.29	Sports equipment		
	£3745	RealPE resources and training. This is a whole school approach to teaching PE which we have decided to buy into. The PE coordinator receives 3 full days of training, we have a whole staff inset in September, and then some half days of support following this. It is a scheme which is very good for subject knowledge and means that every child in the school is accessing the same level of PE teaching.	Our staff subject knowledge and confidence will be increased and the children will be building on their skills as they move through the school, rather than playing a bit of each different sport. These skills will enable them to access all sports at secondary school and create active adults who have	After the initial outlay to purchase resources and training, RealPE costs £375 a year to run the online platform which should be able to be funded from core budget.

				the skills to be able to take up whatever activity the like.	
		£1029.95	Transport to competitions and sporting experiences.	We have already seen a huge increase in pupil engagement and participation, with 25 trying out for the football team, 30 for the netball team, and over 100 trying out for the 2 cricket teams.	We will continue to enter competitions, as entering and being competitive raises our children's standards as they are being challenged.
		£2109	Support for chn to attend the Year 6 residential	This means that more children are able to go on the residential and experience Outdoor Adventurous Activities.	Without the Sports Premium, we would have to seek funding from elsewhere to continue to subsidise the children's places.
		£2255	Supply cover to allow members of staff to attend training and take children to competitions.		

Total spent: £22,788.24

Balance c/f to 19/20: £2066.76

Number and percentage of Year 6 children who can swim 25metres, as of July 2019:- 18/60 = 30%
